

SENSOR+TEST 2015 Preview

The 22nd international SENSOR+TEST trade fair will be held from the 19th to the 21st of May 2015 at the Nuremberg Exhibition Center. SENSOR+TEST is a must-attend event for developers, engineers, and users from all industries as well as for engineering and science students. State-of-the-art sensor and measuring technology is crucial for the development and sustainability of devices, machines, systems, and processes. Moreover, without the latest testing technology, the ever-increasing demands on the reliability of products and processes could not be met.

The forums will provide invaluable information, guidance and new product announcements for visitors throughout the show

SENSOR+TEST provides an opportunity to meet innovative suppliers of sensor, measuring, and testing technology

The 15TH AMA Innovation Award will be presented at SENSOR+TEST 2015

For more information contact:
AMA Service GmbH
 Von-Münchhausen-Str. 49
 D-31515 Wunstorf
 Tel: +49 5033 9639-0
 Fax: +49 5033 10 56
 Email: info@sensorfairs.com
 Web: www.sensorfairs.com

There is no comparable platform in Europe where innovative users can meet so many innovative suppliers of sensor, measuring, and testing technology from all over the globe. The AMA Association for Sensors and Measurement backer and AMA Service organiser count with 550 exhibitors and approximately 8,000 visitors.

The AMA Conferences "SENSOR 2015" and "IRS² 2015" will run in parallel to the exhibition and enrich the event with scientific facts and prognoses for the future of this industry.

SENSOR+TEST isn't just a trade fair, but will offer you numerous possibilities alongside the exhibition to collect up-to-date knowledge about the state-of-the-art.

For example in the forums where exhibitors will present their new products and of course in the action area as well where you will be able to experience dynamic applications in sensor, test and measurement technology.

Make use of these key ports of call to obtain free information and guidance.

Focal Topic for 2015: Environmental Monitoring

Environmental protection in industry – as well as in general – is hardly possible without reliable measuring values. Whether we want to avoid health hazards, optimise industrial processes, or comply with new statutory requirements: Precise monitoring of ambient conditions is now a more important task for sensing, measuring, and testing technology than ever before.

This is why the Exhibitors' Committee in cooperation with the Executive Board of the AMA Association for Sensors and Measurement chose Environmental Monitoring as the Special Topic for the SENSOR+TEST 2015. The spotlight is to be on systems for measuring air quality.

From the 19th to the 21st of May in Nuremberg, the SENSOR+TEST will present the state of the art technology for this sector. Besides going to the many presentations at the stands of the exhibitors, visitors can get a concentrated overview of new relevant products and solutions at the Special Forum in hall 12. Moreover, the presentation forum in hall 12 is to be dedicated to "Environmental Monitoring" on Tuesday, the first day of the fair.

AMA Innovation Award 2015

At SENSOR+TEST 2015 the AMA Innovation Award will be presented for the 15th time.

The award, bestowed every year by AMA Verband für Sensorik und Messtechnik e.V (AMA Association for Sensors and Measurement), is among the most coveted prizes in sensor and measuring technology.

The 10,000 Euro Innovation Award is bestowed directly to the development team, not the enterprise or institute. The main criteria for the jury, comprising representatives of universities, research facilities, and enterprises, is the degree of innovation and high usability.

Special Stand: "Vision Sensors and Systems"

Image processing requires sensors and systems, which are presented at the SENSOR+TEST.

To point out their significance, a special stand dedicated to "Vision Sensors and Systems" (hall 12, stand 12-577) will once again be part of SENSOR+TEST 2015, where companies and institutions will showcase their innovative products and solutions.

Chemical Sensors

Sensors for determining the concentration of combustible, explosive, toxic, or other gases, have been at the focus of the SENSOR+TEST for years. In the reports submitted by the exhibitors this year, optical processes are again emphasised. Alongside catalytic sensors, there is a wide offering of wet chemical sensors for pH value, oxygen concentration, or conductivity.

Conferences

SENSOR+TEST is one of the major international scientific forums for sensors, measuring and testing technologies where researchers and other professionals from all over the world meet to discuss new technologies and the latest processes.

Regardless of whether you are presenting a paper about an innovation or simply participating in the conferences, you will, in any case, profit from this international combination of exhibition and conferences.

SENSOR 2015

17th International Conference on Sensors and Measurement Technology and

IRS² 2015

14th International Conference on Infrared Sensors & Systems

Nürnberg - an Attractive Exhibition and Congress City

Good accessibility is a decisive factor for the ideal exhibition and congress location. Nürnberg is conveniently located in the strong economic region of Southern Germany. The city is easily reached by air, rail and road.

The Exhibition Centre inclusive NCC Nürnberg Convention Center is connected by underground to the rail station and airport. The Exhibition Centre underground station is designed so that you can reach the exhibition and congress site without getting your feet wet during rainy weather. As the secret of good service lies in the details - as everyone knows - there is also a separate taxi lane up to the covered entrance.

The special charm of Nürnberg and its region lies in the blend of tradition and innovation in the midst of an exceptionally attractive cultural landscape.

The atmosphere in the city is open and characterized by the Southern German lifestyle, which combines business and pleasure in a relaxed and enjoyable way. Nürnberg offers all the attributes of a city with a rich cultural life. This becomes clear, for example, in the lovingly rebuilt old town. Incidentally, many historical buildings can be used for stylish receptions and invitations.

Last, but not least: Nürnberg has over 20,000 hotel beds in all categories of comfort.

Essential Event Information

Venue

Nürnberg Exhibition Centre,
 Messezentrum 1, 90471
 Nürnberg, Germany

19.5. - 9 a.m - 6 p.m

20.5. - 9 a.m - 6 p.m

21.5. - 9 a.m - 5 p.m

Ticket Office

1-day ticket - EUR 18,00
